

SL

Calibration Certificate

Model: Focus S 70

Serial Number: LLS082220567

Certificate Number: LLS20567-20250328-EU

Certification Date: 28-Mar-2025

Measurement Items Used, Traceable to National Standards

Laser Tracker

Model: Vantage E

Serial No.: V20003706753

Cert. No.: V06753-23102024

Cert. Date: 23-Oct-2024

Reflectance Targets

Model: CalibLinge Target90

Serial No.: CTE01145

Cert. No.: 24112504

Cert. Date: 25-Nov-2024

Model: CalibLine Target10

Serial No.: CTE01147

Cert. No.: 24112505

Cert. Date: 25-Nov-2024

Model: 0025-Target2

Serial No.: CTE01974

Cert. No.: 24112506

Cert. Date: 25-Nov-2024

Calibration Results

3D Position Accuracy

Target 1	Target 2	Zone	Distance [m]	Uncertainty, k=2 [mm]	Scanner [m]	Deviation [mm]	Spec., k=1 [mm]	Spec., k=2 [mm]	Result
ZK6	ZK7	10 m	2,52618	0,20	2,52605	-0,12	1,5	2,0	pass
ZK6	ZK8	10 m	2,59026	0,20	2,58962	-0,64	1,5	2,0	pass
ZK9	ZK10	25 m	5,15730	0,20	5,15730	0,00	1,5	2,0	pass

Ranging Noise

Reflectance	Distance	Uncertainty, k=1 [mm]	Scanner	Specifications	Result
90%	10 m	0,067	0,07	0,30	pass
	25 m	0,067	0,11	0,30	pass
10%	10 m	0,067	0,20	0,40	pass
	25 m	0,067	0,34	0,50	pass
2%	10 m	0,067	0,52	1,30	pass
	25 m	0,067	0,89	2,00	pass

This certificate shall not be reproduced, except in full, without permission of FARO Technologies, Inc. It invalidates all other certificates generated before the certification date.
The results of this certificate relate only to the items calibrated or tested.
The calibration is done at FARO or FARO Scanner Production operations sites according to FARO test protocols integrating guidelines defined in the Joint Committee for Guides in Metrology guidance document JCGM 100:2008 - Evaluation of measurement data - Guide to the expression of uncertainty in measurement, and the requirements for traceability according to the International Vocabulary of Basic and General Terms in Metrology (VIM) and the National Institute of Standards and Technology (NIST).
